

QUALITY MANUFACTURED AIR CONDITIONING THAT REDUCES OPERATING COST

WHILE ADVANCING HOME COMFORT.

Environmentally-Friendly R-410A Refrigerant
Legendary HVAC Direct performance and quality

Every HVAC Direct heating and air conditioning system is designed, engineered, and manufactured with pride. All employees follow strict, quality-driven processes to ensure that all HVAC Direct products offer the legendary performance that has made the brand a recognized leader in the industry.

* To receive the 10-year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec. Full warranty details available at www.hvacdirect.us.

HSX13 – 13 SEER ENERGY-EFFICIENT AIR CONDITIONERS

Our continuing commitment to quality products may mean a change in specifications without notice.

Unmatched combination of *performance*,
efficiency and *affordability*.

That's just what you'll get with the
HVAC Direct

Energy Efficiency is Key...

Enduring Performance

You can count on your HVAC Direct 13 SEER Energy-Efficient Air Conditioner to keep you cool on even the hottest summer days. Your HVAC Direct air conditioner starts with a high-performance, energy-efficient compressor, which operates in tandem with our high-efficiency coil. The coil is made of rifled refrigeration-grade copper tubing and corrugated aluminum fins in a design that maximizes surface area. These high-quality components together cool your home effectively while saving you money on your energy bills!

And if that's not enough, HVAC Direct goes one step further: we install a liquid-line filter dryer in every air conditioner we build. The filter dryer prevents moisture and debris from entering the compressor motor and expansion device, thus preserving the life of the system. Many manufacturers leave this step out, but we've installed filter dryers in our air conditioners since we first started making them because we know they add many years to the life of a unit.

To Controlling the Cost and Comfort of Heating your home

As the owner of a HVAC Direct 13 SEER Energy-Efficient R-410A Air Conditioner, you have made one of the best purchasing decisions possible in the HVAC marketplace. Why do we say this? Because at HVAC Direct, we strive to build heating and air conditioning equipment that offers high performance, energy efficiency, durability, and an environment-complementing design.

R-410A Refrigerant

Your new HVAC Direct HSX13 – 13 SEER R410A air conditioner will not only provide you with energy-saving cooling performance for many years, but it also features R-410A refrigerant. Since this refrigerant does not contain Chlorine, it is more environmentally friendly than R-22 refrigerant, which is currently used in most air conditioning systems.

Add to that a 10-Year Limited Warranty on all functional parts, and you have an air conditioner that offers one of the best product values in the heating and cooling industry.

Your unit's operating costs and seer

"SEER" stands for Seasonal Energy Efficiency Ratio, which is a measurement of an air conditioner or heat pump's cooling energy efficiency, developed by the U.S. Department of Energy. It's a simple formula: the higher the SEER of your unit, the greater its efficiency – and the lower your operating costs. Older installed units in many homes may have actual operational efficiencies of 8.0 SEER —or even less.

In many cases, these older units can really inflate the electric bill. Your new HVAC Direct GSX13 Air Conditioner offers efficiencies of 13 SEER or higher, providing significant savings compared to many older units.

Quality manufacturing backed by warranties and service

Quiet You Can Count On

We know that the last thing you want to hear at night is a noisy air conditioner starting up. So, we build our HVAC Direct 13 SEER Energy-Efficient Air Conditioners with sound-dampening features that help ensure that your cooling system doesn't interfere with a good night's sleep. We rely on a quiet condenser fan system – a three-bladed fan, and a unique louvered sound-control top – to reduce fan-related noise. Your HVAC Direct 13 SEER Energy-Efficient Air Conditioner will keep you cool and comfortable – but you may not hear it when it's working!

Durable Construction

At HVAC Direct, we take pride in our manufacturing and build each unit carefully. We rely on strict, quality-driven processes to build well-designed, top-quality, thoroughly tested products, backed by

the best standard and extended warranties in the industry. We leak-test every single air conditioner three separate times during the manufacturing process, and we run-test each unit before shipment. This quality focus insures a trouble-free installation and a long product life.

Impressive Warranty Protection

At HVAC Direct, we take extra care to build products that will last for years to come. And we're so confident in the durability of our products that we protect all of the functional parts in your HVAC Direct 13 SEER Air Conditioner with a 10-Year Parts Limited Warranty.*

For even greater peace of mind, ask your HVAC Direct dealer about HVAC Direct, an affordable Parts and Labor Extended Service Plan for your entire HVAC system.

Impressive Features and Benefits:

HVAC Direct HSX13–13 SEER R-410A Energy-Efficient Air Conditioners

- 10-Year Parts Limited Warranty
- R-410A Refrigerant
- A high-performance, energy-efficient compressor
- A factory-installed in-line filter dryer for a longer system life
- A louvered cabinet made of heavygauge galvanized steel that protects the coil, while its appliance-quality, post-paint finish resists the effects of weather and time
- A three-bladed fan and a unique louvered sound-control top – all of which add up to quieter system performance
- A high-efficiency condenser coil made of corrugated aluminum fins and rifled refrigeration-grade copper tubing
- An attractive new design, finished in an Architectural Gray color that complements any home environment
- Easy-access design, making the unit easy to service
- Performance certified in accordance with the Air Conditioning and Refrigeration Institute
